R Markdown

Azimuth is equivalent to angle

Distance is in centimeters

```
dat %>%  
  ggplot() +  
  geom_point(aes(y=DISTANCE,x=AZIMUTH, colour = SIGNAL_STRENGTH), size = 1,alpha = .1) +  
  scale_y_continuous(limits = c(0, 500))
```

Clustered Using K Means

```
datCluster <- kmeans(dat[, 2:3],12) #12 Clusters using 2nd and 3rd columns
datCluster$cluster <- as.factor(datCluster$cluster)
dat %>%
  ggplot(aes(y=DISTANCE,x=AZIMUTH,color = datCluster$cluster,alpha=.2)) +
  scale_y_continuous(limits = c(0, 500)) +
  geom_point(show.legend=F)
```

Further Away

```
dat %>%
  ggplot() +
  geom_point(aes(y=DISTANCE,x=AZIMUTH, colour = SIGNAL_STRENGTH), size = 1,alpha = .8)
```
